

We'll keep you  
**looking smashing.**

**McCue** Bumper Guide

Some might mistake our bumpers for decorative accents, with their stunning colors and sleek curves. But behind all that style is the toughest thing out there: polycarbonate—the same material used to make bulletproof glass, football helmets and riot shields. It's eco-friendly, available in seamless form and installs in minutes—to keep your merchandise protected and your store looking new.

# Our strength in bumper comes from a commitment to innovative products and materials.

## Green

**Be good to the Earth,  
for not a penny more.**

Our 100% polycarbonate GreenGuard bumper is tough, attractive and environmentally friendly. Made from pre-consumer recycled material and 100% recyclable, GreenGuard bumper protects the environment just as much as your store. Use it, remove it and recycle it.

The recycling symbol and resin identification code etched on each McCue Bumper are important: they let you know what the bumper made of so it can be commonly recycled. Just place it right into a curbside recycling bin for pick-up.

## Seamless

**Streamline style without the fuss of end caps.**

Through our unique ability to thermoform bumper ends, we can eliminate gaps between bumper and end caps, resulting in a more seamless appearance and fewer spaces to collect dirt. A new, integrated hidden end cap keeps bumper pieces from shifting when hit, resulting in strong and attractive fixture protection in your store.

## Strong

**Takes hard hits and won't hold a grudge.**

Our bumper's shock displacement design works through expansion, quickly absorbing energy and rebounding to its original shape. Make sure your fixtures stay protected with bumper that's engineered to take it.

# GreenGuard™ 1

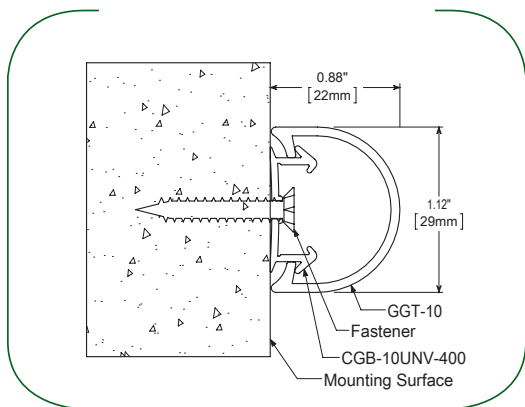

## 1-Inch Rigid Polycarbonate Bumper

GreenGuard is McCue's protective bumper that provides improved impact performance, delivers beautiful aesthetics and is 100% recyclable. GreenGuard 1 is our most versatile offering, suitable for a variety of applications.

- Exceeds the impact performance of PVC by 29% and ABS by 63%
- Polycarbonate is chlorine-free, 100% recyclable and better for the environment than PVC
- All parts snap together for easy installation and guaranteed alignment, creating a more polished look
